

NGUYEN HOANG TRIEU VY

FULL-STACK AI INTEGRATION INTERN

☎ 0582090300 ✉ nhtrieuvy2004@gmail.com 🌐 <https://github.com/nhtrieuvy> 🔗 <https://portfolio-nguyenhoangtrieuvy.vercel.app>

SUMMARY

Final-year Information Technology student based in Ho Chi Minh City, applying for Full-stack AI Integration Intern (System & App). Experienced in integrating AI APIs into web/app workflows, including chatbot-style interaction, prompt-based automation and API-driven backend services.

EDUCATION

OPEN UNIVERSITY - BACHELOR'S DEGREE IN INFORMATION TECHNOLOGY

2022 – Expected 07/2026 | GPA: 3.12/4.0

TECHNICAL SKILLS

- Backend: Python, Django REST Framework, Java Spring Boot, Node.js, RESTful API, OAuth2, JWT
- Frontend/App: Flutter, React.js, React Native, JavaScript, HTML/CSS
- Database & System: MySQL, Redis, WebSocket, Celery, Docker, Firebase, Cloudinary
- AI/ML: Machine Learning basics, NLP, Sentiment Classification, Scikit-learn, AI API Integration
- Integration: Telegram Bot, Email Workflow, OpenSandbox, OpenClaw, Third-party API Integration
- Tools: Git/GitHub, Postman, Swagger/OpenAPI, Linux/Unix
- Other Programming Languages: C++, C#, Dart

EXPERIENCE

GRADIENTS TECHNOLOGIES – AI SOFTWARE INTERN

03/2026 – 05/2026 | REMOTE

- Worked on AI-focused system integration tasks involving OpenSandbox, OpenClaw, chatbot workflow and third-party API integration.
- Analyzed OpenSandbox/OpenClaw architecture, data flow and service boundaries to reduce direct database dependency.
- Integrated and tested OpenClaw chatbot with Telegram and email-triggering workflow, including command handling and error cases.
- Built a working RAW HDR/MEF prototype and evaluated limitations in exposure balance, color consistency, noise and artifacts.

PROJECTS

PlanPalApp – Collaborative Travel Planning Platform

Individual Project | 08/2025 – 05/2026

GitHub: <https://github.com/nhtrieuvy/PlanPalApp>

Tech stack: Flutter, Riverpod, Django REST Framework, Django Channels, MySQL, Redis, Celery, Docker, Firebase, Cloudinary

- Built a production-oriented travel planning app with group collaboration, realtime chat, activities, budget tracking, audit logs, notifications, analytics and map/location sharing.
- Designed clean architecture with bounded contexts for auth, groups, plans, chat, budgets, audit, notifications, analytics and locations.
- Developed RESTful APIs and WebSocket channels using Django REST Framework, Django Channels, Redis and Celery for realtime and async workflows.
- Added Swagger/OpenAPI docs, Docker/Fly.io deployment setup, Locust performance testing and AI-optimized system design documentation.

Vietnamese Sentiment Classification Tool — Samsung AI Project

Academic Project | Python, NLP, Scikit-learn, Machine Learning

GitHub: github.com/Thao5/sentiment_transformer

- Built an NLP tool to classify Vietnamese shop comments into positive, neutral and negative sentiment labels.
- Preprocessed text data and experimented with multiple ML classifiers for sentiment analysis and review filtering.

E-Commerce Web — Online Shopping Platform

Team of 2 | Backend Developer | 05/2025 – 07/2025

GitHub: github.com/nhtrieuvy/SpringEcommerceApp

- Developed backend APIs for product, cart, order, payment, review, chat and admin analytics modules.
- Implemented JWT/OAuth2 authentication, Spring Security RBAC, email verification, MoMo/PayPal sandbox payment and realtime chat.

CERTIFICATES

Samsung Innovation Campus - Artificial Intelligence course

LANGUAGES

English (CEFR): B2 in Reading/Listening, B1 in Writing/Speaking
